## Zip It™ Travel Security Sock Review

Combination of travel security and high-tech fibers

More and more, tourists who were mugged report that their moneybelt was the first thing that the mugger went for. Zip It™ Travel Security Socks offer another location to keep your valuable documents. The pocket is large enough to accommodate a passport and other items. They are also made with some of the most innovative fibers available. Zip It™ Travel Security Socks are built with ComFortrel XP® for moisture management and antimicrobial AEGIS® to control the growth of bacteria and fungi. Zip It™ Travel Security Socks also incorporates HoloFiber, a fiber that improves oxygen levels in the blood stream, which in turn increases energy and reduces recovery time.
